

**Adding a new  
dimension to  
education**

## **Science Workshop**

### **What Makes Our Program Unique?**

Children explore the exciting world of chemical engineering through 10 unique experiments each term — designed to show them how chemistry shapes industries, technology, and everyday life.

---

Is your child fascinated by science, experiments, and how things work? At ETB Chemical Engineering, we turn that curiosity into hands-on learning through dynamic, weekly workshops that blend education with real-world applications.

---

## **Chemistry + Curiosity + Creativity = Science Workshop**

Students explore the exciting world of chemical engineering through 10 unique experiments each term—designed to show them how chemistry shapes industries, technology, and everyday life. Hands-On experiences they'll love: **Extract natural pH indicators from everyday items, make sweets and ice cream using real manufacturing methods, formulate their own eco-friendly cosmetics and toiletries.**

Students will learn:

**The science behind everyday products.**

**Safe chemical handling and experimentation.**

**Industrial-scale food production techniques.**

**Problem-solving through experimentation and teamwork.**

---

By connecting scientific concepts to real-life challenges, our program empowers children to think like future engineers, researchers, and inventors—fostering a lifelong love for STEM and sustainable innovation.
